New Bearded Iris CARIBOU TRAIL

Eden Road Iris Garden

P. O. Box 117
Wenatchee, Washington

1957

Foreword

Greetings to all of our old customers and to you who are about to be customers. It is you and you alone who keep the wheels turning. Without you we are nothing, so to us you are very important people indeed.

The garden gates are open on week days from 10:00 A.M. to 5:00 P.M. During blooming season, we are also open Saturdays and Sundays same hours; evenings by appointment. You are cordially invited to visit the garden and see the modern iris, the rockeries, and the shrub and flower borders. Each year we seem to expand a little more, and this past year was no exception. More acreage has been planted to iris. Changes have been made in the landscaping to further enhance the beauty of the setting.

This Spring Region 13 of the American Iris Society is to hold its meeting in Wenatchee during blooming season. Region 13 is composed of Washington and Oregon. We are expecting visitors from other Western states as well. Many new iris have been added so that the visitors will have plenty to see. Guest iris are plentiful both under name and number. Other local gardens will be on the tour, plus a visit to Ohme's world famous Alpine Gardens in the Sky. If you like to see seedling iris, we will show them to you by the thousands.

We'll be looking for you. If you can't come, be sure to send in that order and do it early. We'll treat you right, of that you can be sure.

GORDON W. PLOUGH

About the catalog

Much research and checking has gone into forming this catalog. In the main variety list, after the variety name comes the hybridizer's name and the year the iris was introduced. Next comes the symbol for the season of bloom—E, M, L—signifying Early, Medium, and Late. After this in parenthesis is the breeding. Here look first for the capital "X." To the left of this is the pod parent. To the right is the pollen parent. This capital "X" is my own idea. In involved parentages, it is proving invaluable in helping to simplify and speed up reading of these lineages. Fern Robinson, the Registrar of the American Iris Society, has adopted this idea and it is now officially a part of the records in listing the new varieties that are registered each year. Following the parentage is a brief description. Then comes the awards an iris has won.

A word about the awards may help you who are not A.I.S. members to understand them. H. C. (High Commendation) is an award given to a seedling iris, either under number or name, not introduced at time of judging. This is a recommendation that this variety is worthy of introduction. Next honor in line that an iris may win is the H. M. (Honorable Mention). Any iris that has been officially registered and introduced before the current July 10 is eligible for this award. Next comes the A. M. (Award of Merit). This award is given only to those iris that have won an H. M. not less than two or more than five years prior to the current season. The top award is the Dykes Medal. For a tall bearded iris to win this, it must first have won an A. M. during the previous four years. Mention should be made here, too, of the President's Cup award. This is given to the outstanding iris variety seen at each yearly convention of the A.I.S.

So keep in mind in reading this catalog that there is just one Dykes Medal awarded each year. There are 12 A. M.'s awarded each year (or more if a tie vote appears for 12th place). There is no limit to the number of H. M.'s awarded each year. A variety must receive 12 A.I.S. judges' votes to get this award. There were 64 H.M.'s awarded to Tall Bearded iris in the 1956 voting.

Cultural Directions for Bearded Iris

Rhizomes will be shipped to you in a firm condition and should be planted as soon as possible after they are received. If you are unable to plant on receiving them, then be sure and keep the rhizomes in a dry and cool place until you can plant them.

Your soil should be damp before planting and a good wetting after planting is usual, depending on weather conditions. After roots are well established, be careful and DON'T water too often. Bearded iris demand good drainage. If your soil is heavy and poorly drained, set the rhizomes a little higher than the surrounding soil. The rhizome should be planted so the soil just covers it and no more; be sure and spread the roots well and firm the soil around them. This will anchor the rhizome until the new roots form.

A small handful of bone meal to each plant well worked through the soil before planting is advised. In early spring a side dressing of WELL ROTTED manure produces beautiful blooms. Care must be taken not to allow any fertilizer to come in direct contact with the rhizome.

Separate your plants about every third year for best results.

CRINKLED SUNSET

The most heavily laced and shirred creation yet developed in the garden. A blend of sunset coloring, the standards are lavender and buff while the falls are violet, pink, and buff. Of entirely different form than either Butter-scotch Kiss or Caribou Trail, you are sure to like this very colorful iris. Co-introduced with Iris Test Gardens.

New Introductions for 1957

ALICE LEMEN

This cross produced a host of lacy beauties of a lemony hue. Alice Lemen, named in honor of my sister, had the most heavily crimped and fluted edges of any of them. The falls are white with clean hafts of Empire yellow, Wilson 603. The nicely closed standards are Empire yellow, Wilson 603/1. Beard is bright yellow. This is fertile both ways and is producing fine seedlings.

1957 INTRODUCTIONS

Here are the 1957 offerings in new iris from the Eden Road Iris Garden. We feel that there is a place for all of these new varieties in the flower gardens of the world. We sincerely hope some of these will find favor with you. Six of these new creations are shown in full color in this catalog. Four of these are co-introduced with the Iris Test Gardens of Yakima, Wash.

ALICE LEMEN. (Plough '57) M. 31 in. No. 51-61-3. ((Gold Ruffles x Cherie) X Twenty Grand). Sib to Riviera. This cross produced a host of lacy beauties of a lemony hue. Alice Lemen, named in honor of my sister, had the most heavily crimped and fluted edges of any of them. The falls are white with clean hafts of Empire yellow, Wilson 603. The nicely closed standards are Empire yellow, Wilson 603/1. Beard is bright yellow. This is fertile both ways and is producing fine seedlings. Pictured on page 3. \$25.00 net*

BUTTERSCOTCH KISS (Plough '57) ML. 36 in. No. 51-129-7. ((Cascade Splendor x Honeyflow) X Twenty Grand). Sib to Caribou Trail. At last we are going to release this much sought after creation. The general effect is Butterscotch yellow with a gold dust glitter over all. In some lights there appears to be an orchid infusion. The closest color by Wilson is Barium 503/1. There is an intensification of the yellow in the heart of the flower and on the petal edges. The large flowers are heavily substantiated with edges of petals very heavily laced. Fertile both ways. Co-introduced with Iris Test Gardens. Stock still very scarce. H. C. '55. Pictured on page 5. \$35.00 net*

CARIBOU TRAIL (Plough '57) ML. 32 in. No. 51-129-3. ((Cascade Splendor x Honeyflow) X Twenty Grand). Sib to Butterscotch Kiss. Beautiful rich medium golden brown with a bright violet blaze radiating out in the center of the falls. All petal edges are heavily crimped and shirred on this large heavily substantiated creation. Liked by many better than Butterscotch Kiss as it is more deeply colored. Vigorous grower. Co-introduced with Iris Test Gardens. Pictured on front cover \$25.00 net*

CHLOE INEZ (Plough '57) EM. 35 in. No. 50-52-5. (Aladdin's Wish X Pretty Pansy). Sib to Williaw. Intensely contrasty fancy type plicata. Color is Amethyst violet, Wilson 35/1, with snow white hafts, throat, and styles. Beard is light yellow. Cleaner and clearer colored than either parent. Name is pronounced Chlo'-e E'-nez. \$15.00

CUBA LIBRE (Plough '57) EM. 35 in. No. 50-51-1. (Aladdin's Wish X Cuban Carnival). Fancy type plicata. Standards are Pansy violet, Wilson 003/1. Falls are Plum purple, Wilson 934/3. Where Chloe Inez is white, Cuba Libre is bright clear yellow on the hafts and throat. The styles are yellow and violet. Name is pronounced Cu'ba Lee'-bray. \$15.00

These last two iris, Chloe Inez and Cuba Libre, make a fine pair planted together. If you would like them both, you may have the pair for the special price of. \$22.50

CRINKLED SUNSET (Plough '57) ML. 32 in. No. 51-65-9. (Quest X Cliffdell). Sib to First Flight. The most heavily laced and shirred creation yet developed in the garden. A blend of sunset coloring, the standards are lavender and buff while the falls are violet, pink, and buff. Of entirely different form than either Butterscotch Kiss or Caribou Trail, you are sure to like this very colorful iris. Co-introduced with Iris Test Gardens. Pictured on page 3. . . \$20.00 net*

FIRST FLIGHT (Plough '57) M. 33 in. No. 51-65-21. (Quest X Cliffdell). Sib to Crinkled Sunset. Color is Bishop's violet, Wilson 34/3. The nicely domed standards are lightly suffused with buff. The falls are heavily arched and flaring. Edges of all petals are heavily crimped and fluted. Here you have the lace edges, now so popular, on a different color. Beard is yellow \$20.00 net*

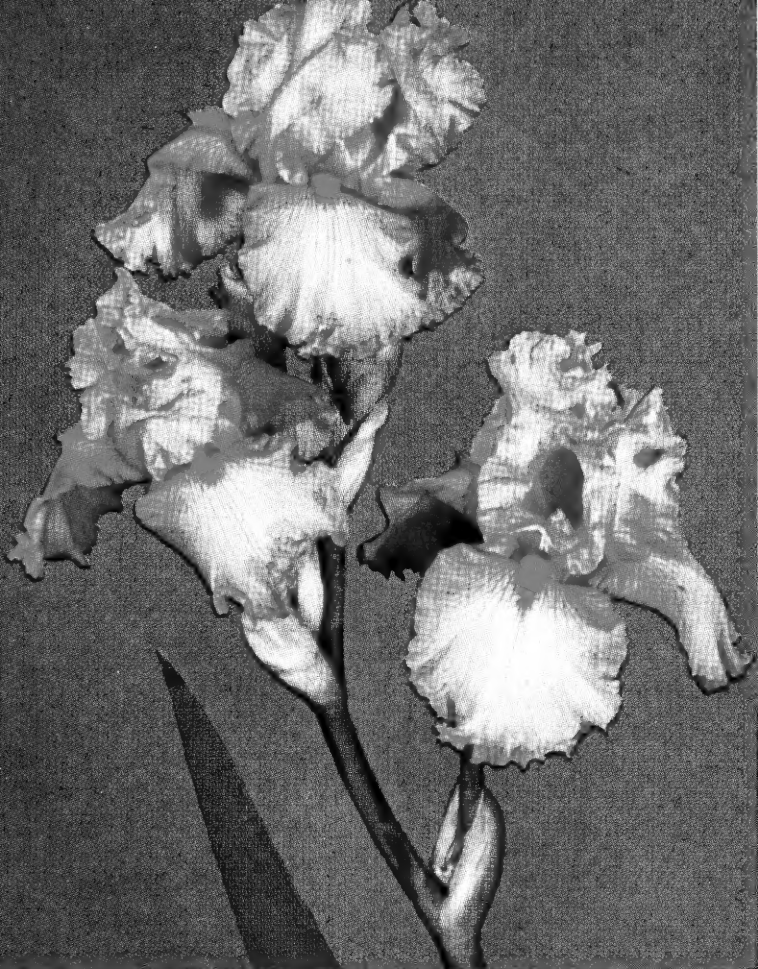

PRETTY GAY (Plough '57) ML. 34 in. No. 52-25-13. (Party Dress X Mary Randall). All of the seedlings from this cross were in varying shades of pink and rose except one. It was startlingly pure white with a fiery red beard. At first we called it White Mary. There are no haft markings to mar its chaste beauty. The petals are wide and of good substance. Branching is very fine. A grand quality iris you will be proud to grow. Fertile both ways. Co-introduced with Iris Test Gardens. Pictured on back cover. H. C. '55. \$25.00 net*

RIVIERA (Plough '57) ML. 34 in. No. 51-16-13. ((Gold Ruffles x Cherie) X Twenty Grand). Sib to Alice Lemen. Very large Dresden yellow self, Wilson 64/2, with a blue white flush below the yellow beard. The whole flower is very wide and full and is heavily ruffled. Well branched and a vigorous grower. Pictured on page 5. \$20.00

WILLIWAW (Plough '57) EM. 34 in. No. 50-52-4. (Aladdin's Wish X Pretty Pansy). Sib to Chloe Inez. Here is a novelty that the visitors always exclaim over. The buds are Violet, Wilson 36/2, blended to white. The flowers open to chalk white. All of the color is on the underside of the falls. You think you are seeing things when you see the white flowers opening from the violet buds. This is a real conversation piece. The petals have an odd crumpled texture and the beard is light yellow tipped white. This unusual iris has an Albino look. Named for the snow-swirling winds of the arctic northland. \$10.00

*Note — All varieties marked net do not figure in any price premium as shown in this catalog. All other introductions are subject to the Free Premiums as shown on page 7.

BUTTERSCOTCH KISS

At last we are going to release this much sought after creation. The general effect is Butterscotch yellow with a gold dust glitter over all. In some lights there appears to be an orchid infusion. The closest color by Wilson is Barium 503/1. There is an intensification of the yellow in the heart of the flower and on the petal edges. The large flowers are heavily substantiated with edges of petals very heavily laced. Fertile both ways. Co-introduced with Iris Test Gardens. Stock still very scarce.

New Introductions for 1957

RIVIERA

Very large Dresden yellow self, Wilson 64/2, with a blue white flush below the yellow beard. The whole flower is very wide and full and is heavily ruffled. Well branched and a vigorous grower.

For many years we have made the trek up to Coeur d'Alene, Idaho, to the beautiful estate of the Ralph S. Nelsons. Amidst a setting of tall pines, Mrs. Nelson (Jeannette), a gracious lady with a green thumb, grows iris to perfection. Each year her seedlings have increased in quality and beauty. She is a very discerning judge and only the very best things are retained for the visitors to see. In the Spring of 1956, Mrs. Nelson and I selected four seedlings from her entire planting and these are offered here exclusively and for the first time. We think you will like them. Two of them have already won awards from the American Iris Society.

CALL ME MADAM (J. Nelson '57) M. 44 in. No. 54-58-1. (Pagan Princess X Mary Randall). This wide, very flaring, Magenta Rose, Wilson 027/2, gets its height from its pod parent and its fine substance and finish from Mary Randall. The lovely rose color of the falls is slightly shaded tan toward the haft. Beard is bright tangerine. The standards are well domed and the branching is excellent. \$20.00

HOT MUSTARD (J. Nelson '57) ML. 42 in. No. 54-71-4. (Gaylord X Pinnacle). As the name implies, there is nothing mild about this bright sulphur yellow bitone. The whole flower has a greenish glow and it fairly screams for attention. The wide, flaring falls are very deep in color. The standards are a very light tint of the same color, and the beard is orange. Three branches and terminal. H. C. '56. \$20.00

MONKEYSHINE (J. Nelson '57) M. 38 in. No. 54-F-15. (Port Wine X Ten Sleep). The standards of this very unusual iris are dark violet. The falls are all different in violet and white stripes with the violet predominating. It has good form and substance, and most outstanding branching. There are four branches and terminal and the lowest branch is branched. As the name would lead you to believe, this iris is up to tricks, and a clump with many varieties of pattern is very interesting and attractive. \$15.00

VIKING (J. Nelson '57) EML. 46 in. No. 54-25-1. ((Blue Shimmer x Chivalry) X Rose Ames). This huge plicata is distinctly different from other plicatas. The whole flower has a white ground dotted and shaded Dauphin's Violet, Wilson 039. The style arms are a solid dark violet and are prominently displayed against the light flower. In spite of its great size, the flower has fine shape and holds itself well. From a distance, Viking gives a light blue effect. Really stunning. H. C. '56. \$25.00

My chief helpers this year again were Gerry Smith and Jerry Bainard. Both are Juniors this year in Eastmont High School. Both played on the football team. Gerry is on the basketball team, but Jerry didn't have quite enough height. Goldie Wyatt was with me from early Spring until apple packing time in the Fall. I was fortunate in having Gerry's older brother, Jim, for most of the past Summer, also Rennie Keasal who both did a fine job of conditioning the plants. These are the people mostly responsible for the fine large rhizomes we were able to ship to you last Summer. Others who helped out in the garden at different times included Rhea Melton, Don Axtell, Emma Grissom, Eddie Davis, Roy Toliver, and Kearn and Earl Overman.

PLEASE READ CAREFULLY

Get your order in early. We ship only during July and August. On all orders postmarked before May 31, 1957, you may select 10% of your iris order (value) as an added premium. This is not a cash discount and should not be used as such.

NEW ADVENTURE (Muhlestein '54) EM. 38 in. (Loomis Sdlg. X Pink Formal). The first of a new race. At last a plicata with a tangerine beard! Pink Formal must carry the plicata gene as Opal Brown also got a tangerine bearded plicata — Captain's Lady — by using it. Tell is too modest in his description of this New Adventure into iris breeding. Background color is white with pinkish violet markings. The beard adds the spark that sets it off. Really gay and charming \$7.50

NEW HOPE (DeForest '50) EM. 36 in. (Involving Alta California, Sacramento, Tiffany, and Blue Shimmer). Large, beautifully formed white ground plicata with heavy pattern of dark violet-blue. Very heavy substance. Simply stunning. H. M. '51. . \$1.50

- ORANGE BANNER** (Waters '55) ML. 34 in. (Orangeman X Orange Gem). Another fine new orange but from an entirely different line of breeding. The large blooms are of Indian yellow flushed cadmium orange. The entire flower is wide and full. H. M. '55. \$17.50
- ORANGE CREAMO** (Muhlestein '53) ML. 38 in. (Salmon Shell x Pink Formal) X (Apricot Glory). Apricot-orange self with a fine lineage. The wide flowers are full and clean. Stalks are tall and well branched. H. C. '52. \$7.50
- ORCHID MIST** (Sass '50) M. 38 in. (Involving Flora Zenor, Midwest Gem, Prairie Sunset, etc.). Rich orchid self with a fiery red beard. Flower is wide and full formed. Good parent. \$1.50
- ORCHID RUFFLES** (Schreiner '54) EM. 34 in. (Involving Harriet Thoreau, Angelus, Matula, Noweta, Violet Crown, etc.). Orchid-lavender self of good substances. Petal edges are crimped and lacy. Should be a good breeder to produce lace edges. H. M. '56. \$5.00
- ORELIO** (DeForest '47) M. 36 in. (Casa Morena X Garden Flame). Large dark red of silken finish, with broad petals, and flaring form. Rich and brilliant. H. M. '48. \$1.00
- ORIENTAL GLORY** (Salbach '50) M. 37 in. (Brilliant Amber X Sultan's Robe Sdlg.). Glowing new red blend. Standards are mahogany red. Falls are mahogany shaded brown with a brilliant blue blaze in the center. There is a touch of gold at the haft. Very fine. H. M. '52. \$2.50
- ORIENTAL MAGIC** (Wells '55) M. 38 in. (((Ruth Pollock x Welcome) x (Tiffany x Los Angeles)) X Capitola). Novel fancy plicata. Standards are soft wisteria. Falls same striated orchid-violet. There is a white area around the white beard. Flowers are large and attractive on well branched stalks. \$10.00
- OYEZ** (White '38) E. 18 in. (Polyhymnia X Jubilee). Exotic little oncobred that is very beautiful. Ground color is off white. Standards are veined dark rose while falls are heavily lined blackish maroon. A. M. '41. \$1.25
- PACEMAKER** (Lapham '50) M. 36 in. (Edward Lapham X Red Waves). Rich red of large size and excellent form. One of the best from a breeder that specializes in reds. H. M. '50. \$1.50
- PAGAN GOLD** (G. Douglas '51) ML. 38 in. ((White Prince x Easter Morn) x Golden Hind) X (Mimosa Gold). Large ruffly deep golden yellow. Substance is heavy and finish is rich and velvety. H. C. '48. \$4.00
- PAGAN ROYAL** (G. Douglas '51) M. 38 in. (Gulf Stream) X (The Bishop x The Black Douglas). Rich glowing red-violet, big and bold. The standards are broad and domed; the flaring falls are large and well rounded. Stalk, branching, and bloom placement are all excellent. H. M. '52. \$3.00
- PALOMINO** (D. Hall '52) M. 36 in. (Hi-Time X D. Hall 46-31). Soft ivory standards with a pink infusion rise above pale ivory falls with amber-orange shoulders and narrow band all the way around. Add a rich bonfire red beard and you have a pastel iris that still is a riot of color. Of course there is size, substance, branching, etc., too, so you can't miss. A. M. '54. Pictured on page 31. \$5.00
- PARADISE PINK** (Lapham '50) ML. 36 in. (Forerunner) X (Spindrift x Isabellina). Showy deep pink with red beard. Form is flaring with good substance. This is being used a lot in hybridizing. A. M. '52. \$1.25
